7. Dados persistidos após reinício (GET /clientes)

Evidência referente à etapa: 7. Dados persistidos após reinício (GET /clientes)

The screenshot shows the Postman interface with a workspace named 'marcus's Workspace'. A collection named 'My first collection' is open, showing a folder 'First folder inside collection' with a 'GET' request to 'http://localhost:5000/clientes'. The request is sent, and the response is a 200 OK status with a response time of 82 ms and a body size of 229 B. The response body is a JSON array containing one object with the following data:
[
 {
 "name": "Marcus Calazans",
 "email": "marcus@email.com"
 }
]
